
imap link to article pop-up

Posted by Mymind - 2011/11/07 13:17

Hello,

I have an image placed in a custom-module. The image is with 4 image-maps which each should link/open an Joomla article in a pop-up. Is this possible in Fancybox and how do I do it?

thanks!

Hello,

"System - ARI Fancybox" plugin can be used for this purpose. Add the next attribute to tag:

`class="arifancybox iframe {width: 800, height: 450}"`

A sample code looks like:

Thanks! :-)

but, I only want to link to an Joomla article - not a whole website is this possible?

Thanks!

A link to specific article looks like:

`index.php?option=com_content&view=article&tmpl=component&id=ARTICLE_ID`

Where ARTICLE_ID is ID of an article which you want to load. For example if you want to load article with ID equals to 73, use the next link:

index.php?option=com_content&view=article&tmpl=component&id=73

Hello again,

I have problems on my Ipad... the pop-up is showing up behind the youtube video and there is no scrollbar in the pop-up.

You can see the problem here: <http://vmse.dk/index.php/ridning>

Works fine in Crome, Safari, IE and Firefox on mac and PC, however it doesn't work in Safari on the Ipad.

thanks!

Mihcael

Hello,

Safari browser for mobile devices doesn't support transparency so fancybox is shown behind a video.
