## I need help with Thumbnail to Joomla Article

Posted by BorisDDS - 2012/02/21 21:49

---

Hello.  
I need your help with the FancyBox settings  
I am a doctor and I would like to have my "photo" and/or "read more" on the frontpage (module) in Joomla 2.5 to popup the FancyBox with my biography (Article)  
my Website is <http://www.estheticsmile.com>

Also I would like to know if it is possible to Click on the TopMenu "Contact Us" and have a RSForm come up in the FancyBox?

=====

Hello,

If you want to show an article into fancybox, "ARI Fancybox Anywhere" plugin can be used for this purpose. Code will look like:

```
{arifancybox activeType="article" opt_width="300" opt_height="250" id="ARTICLE_ID" title="Article"}Show  
article{/arifancybox}
```

Where ARTICLE\_ID is ID of the article which you want to load into the lightbox.

About "Contact us" menu item, we can't find it on provided page. Probably you mean "About us" or "Location" menu item?

Regards,  
ARI Soft

I have tried the code you gave me and the result is the Fancy Box popus and NO ARTICLE Inside (IT IS BLANK)!!!!  
Please help me.

I need to make a Fancy Box popup when visitors click on my Photo and "Read more" in the Grid-Top

I have tried to make it happened but I only can make the inline text work.

1) I don't have the RSForms yet I was just wondering if it is possible with the Fancy Box?

Please help me!

Could you provide a temporary access to your J! backend by email so we can investigate an issue with loading articles into the lightbox?

It is possible to show menu items into the lightbox with help "ARI Fancy Links" plugin.

Regards,  
ARI Soft

Try now please. It was the problem with site template. It contained empty template for component view. We modified component.php site template file so it works properly.
