
Customized thumbnail

Posted by jaag26hon - 2012/02/22 17:30

I am using the code below to make a single thumbnail picture show a gallery. However, I would like to use my own thumbnail. I used the following parameters thumbPath="images/album1/thumbnail/thumb.jpg", and I know what I am doing wrong.

```
{arifancybox activeType="imglist" dir="images/album1" thumbPath="images/album1/thumbnail/thumb.jpg"}{/arifancybox}
```

Hello,

Use the next code:

```
{arifancybox activeType="imglist" dir="images/album1" type="customtext"}
```

That reply was quick!!! ;)
Thank you very much!! :)

hello,

I used the following code to make a thumbnails like the of the picture attached.

<http://www.ari-soft.com/images/fbfiles/images/thumbnails.jpg>

Â Â Â Â

Do you have any idea how I can open a gallery when clicking on one of those thumbnails?

also, you provided me this code which worked perfectly, but is there any way to add title to the picture?

```
{arifancybox activeType="imglist" dir="images/album1" type="customtext"}{/arifancybox}
```

I have also looked at the other question and made my search, but I have not found any good result.

Thanks in advance,

1. Are these thumbnails generated by "ARI Fancybox" or this is a HTML code on a page?

2. Do you want to add a title under a thumbnail or mean something another?

It's HTML code; I would like to add title to the thumbnail and to each picture of the gallery.

1. You can place HTML code between {arifancybox activeType="imglist" dir="images/album1" type="customtext"} and {/arifancybox} tags.

2. Image titles can be defined in a CSV file. A link to a sample CSV file and instructions how to use it can be found in "Description" field on "ARI Fancybox" module settings.

Would you mind giving me a hint how to use the CVS file? I am Using System - ARI Fancybox Anywhere.

Place a CSV file to folder with images and add titles to the file. It has the next format:

```
"File","Title"
"image01.jpg","1st image"
"image02.jpg","2nd image"
```

Regards,
ARI Soft

For some reason I now getting this errors.

I reinstalled the plugin but it did not work.

Check that "System - ARI Extensions" plugin is installed and enabled and re-save "ARI Fancybox Anywhere" plugin settings.
