How to use Fancy box

Posted by jaag26hon - 2012/03/01 15:58

_____

First of all thanks for this great product and email customer service.

I using Fancy box anywhere product in my localhost before publishing in my main website.
I love it but when I try to use Fancy box anywhere for some thumbnails picture, it does not
give the result I expect. for example; I want to generate thumbnails to like http://www.ari-
soft.com/images/fbfiles/images/2x2.jpg but it shows the
thumbnails vertically even when I insert the html code on in between(just as you recommended me in another post)

So, Is that not possible using Fancy box anywhere? how does the Fancy box module work?
I have tried several settings trying to publish the gallery in the home and gallery pages but I don't see anything.

I have attached a file with some pictures with setting used in the Fancy Box module.

best regards,

Josue Almendares http://www.ari-soft.com/images/fbfiles/files/picture-976f0f8c0df0b14610535b122442fd11.zip

_____

Hello,

What plugin code do you use?

Regards,
ARI Soft

_____

This code shows only one thumbnail and if a user clicks by it, shows other images into the lightbox. It is not clear what
images are show vertical.

_____

I am using the following code; when I remove the Fancybox code, all the thumbnail pictures are organizes in columns
and rows.

{arifancybox activeType="imglist" dir="images/album1" type="customtext"}{/arifancybox} {arifancybox activeType="imglist" dir="images/album1" type="customtext"}{/arifancybox}{arifancybox activeType="imglist" dir="images/album1" type="customtext"}{/arifancybox}

_____

You can wrap this code with a HTML table. For example use the next code:

  {arifancybox activeType="imglist" dir="images/album1" type="customtext"}{/arifancybox}
  {arifancybox activeType="imglist" dir="images/album1" type="customtext"}{/arifancybox}

  {arifancybox activeType="imglist" dir="images/album1" type="customtext"}{/arifancybox}

_____

Thanks it works.
However, I know that Fancy box extension offers great features.
so, I also would like to know how to use the Fancy box module. I
tried different settings buy I have been striking out.

best regards,

josue Almendares

_____

Documentation how to use the module can be found in "Description" field on module settings page. Click by "Detailed help here" link and documentation appears into a lightbox.

_____

I already tried the entire documentatio of the Fancy box module, and I can't make it work.
In the first message, I attached a zipped picture of the Fancy box module screen with some value I already set.

For example; in the directories box I tried several input like
images/album1
"images/album1"
http://localhost/roca/images/album1
"http://localhost/roca/images/album1"

I already installed System - ARI Fancybox and System ARI Extensions in case this is the issue.

Best regards

_____

Set "Image path" parameter to images/album1 value and choose appropriate module position (module positions are provided by site template) in "Position" parameter.
