ARI Fancybox to display module, need image as link

Posted by andersonannem - 2012/03/28 20:20

Hello.

I'm using your ARI Fancybox to display a module, it's working great except for one thing...

I need to use an image as the link instead of text. I did go through your documentation to see what I was doing wrong, but I can't find anything. When I enter the location of the image in the Link parameter, the address of the image is displayed instead of the image being displayed.

When I enter the image as an in between the {arifancybox} tags, the image doesn't show up at all.

Here is how I have it coded at the moment...

{arifancybox activeType="module" opt_titleShow="false" opt_width="650" opt_height="500" id="171" title="Rummeles" link="images/stories/Rummeles-TagHeuer30NEW122010.jpg"}{/arifancybox}

I know the image is there, I just can't get it to show up.

Here is a link to the page: http://rummeles.info/index.php?option=com_content&view=article&id=76&Itemid=143

Any help will be greatly appreciated.

Thank you very much!

Anne

Hello,

Use the next code:

{arifancybox activeType="module" opt_titleShow="false" opt_width="650" opt_height="500" id="171" title="Rummeles"}{/arifancybox}

Regards,
ARI Soft

Hello.

I cut and pasted exactly what you gave me. But the image still won't show up. Just in case, I also put in the full path to the image, but still not working.

Posted by admin - 2012/03/28 21:05

Sorry, try the following code:

{arifancybox activeType="module" opt_titleShow="false" opt_width="650" opt_height="500" id="171" title="Rummeles"}{link}{/link}{/arifancybox}

Hi,

Sorry to jump in on the same thread, but am experiencing the same issue here:
http://www.curiouskidsportraits.com.au/index.php/product/alice

Link is about 2/3 way down and I am using the code you outlined above, but it just comes up as a link in red rather than load the picture as link:
{arifancybox activeType="module" opt_titleShow="false" opt_width="300" opt_height="250" id="137" title="Photo tips"}{link}{/link}{/arifancybox}

Just wondering if you would point me in the right direction on how to get the graphic to load as the button, ahead of the text.

Thanks!
Leo

Re:ARI Fancybox to display module, need image as link

Posted by admin - 2012/08/24 09:41

Hello,

Switch your WYSIWYG editor to plain text mode and re-enter plugin code. The editor encoded HTML code for the image.

Regards,
ARI Soft

Hi. I have the same issue. I have filled in the module fields in the Fancybox admin panel. I'm not using WYSIWYG. My code is:

{arifancyboxÂ activeType="module"Â opt_titleShow="false"Â opt_width="560"Â opt_height="340"Â id="129"Â title="sign up"}{link}{/link}{/arifancybox}

The image shows but not linked. The code just shows as text as pictured in the attached. Can you help? http://www.ari-soft.com/images/fbfiles/images/fbox.jpg

Hello,

Do you use plugin code in an article?

Regards,
ARI Soft

Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate it?

Regards,
ARI Soft

I have a similar problem. Have code in article. The pic shows in the article in the backend, but I get this error when I load the page.

Fatal error: Allowed memory size of 134217728 bytes exhausted (tried to allocate 30720 bytes) in /home/pennwrit/public_html/dev2/joomla-2.5/modules/mod_arifancybox/mod_arifancybox.php on line 32

To daveszyari: try to increase value of "memory_limit" PHP parameter using PHP Settings plugin.

Re:ARI Fancybox to display module, need image as link

Posted by daveszyari - 2013/04/22 23:01

What Id does this refer to?

{arifancybox activeType="module" opt_titleShow="false" opt_width="300" opt_height="250" id="92" title="Photo tips"}{link}{/link}{/arifancybox}

My error after using change phpmemory limit gave this error.
Fatal error: Allowed memory size of 88080384 bytes exhausted (tried to allocate 30720 bytes) in /home/pennwrit/public_html/dev2/joomla-2.5/modules/mod_arifancybox/mod_arifancybox.php on line 32

Re:ARI Fancybox to display module, need image as link

Posted by daveszyari - 2013/04/23 04:54

I took the fancy box code out of the module 92 and just left it in the link item of fancy box.
{arifancybox activeType="module" opt_titleShow="false" opt_width="300" opt_height="250" id="92" title="Photo tips"}{link}{/link}{/arifancybox}

This is what I get now: http://www.ari-soft.com/images/fbfiles/images/4Ari_fancybox__23_2013_12_51_22_AM.jpg

Hello,

Set "Mode" parameter to "Anywhere" in "System - ARI Fancybox Anywhere" plugin settings.

Regards,
ARI Soft
