
No Fancybox

Posted by dache74 - 2012/07/18 05:58

Hi, I am using Joomla 2.5.4, and trying to use Fancybox with an image as a link to open an embedded youtube video using this code in the Custom HTML module (and module 112 is a Custom HTML module with Youtube embed code):

```
{arifancybox activeType="module" opt_titleShow="false" opt_width="650" opt_height="500" id="112" title="iFIL Products and Processes Overview Video"}{link}/{link}/{/arifancybox}
```

The image shows up OK, however, when I click the image, nothing happens and my URL in the address bar shows as <http://ifilusa.com/#afancy50064fe864e6a>

Hello,

Try to load the module into an article (you can read how to do it here) and load the article into the lightbox instead of the module.

If it doesn't help, could you provide a link to a page where we can see the problem so we can investigate it?

Regards,
ARI Soft

Still not working. Here is the page: <http://ifilusa.com/component/content/article/2-uncategorised/16-test>

Set "Include jQuery" and "jQuery noConflict" parameters to "Yes" in the module/the plugins settings and re-save settings.

Fancybox now pops up, but without the embedded video. Here is the current setup:

1. The page (<http://ifilusa.com/component/content/article/2-uncategorised/16-test>) has an article with this code: `{loadposition video1}`

2. A Custom HTML module with position "video1" has this code:

```
{arifancybox activeType="module" opt_titleShow="false" opt_width="650" opt_height="500" id="115" title="iFIL Products and Processes Overview Video"}{link}/{link}/{/arifancybox}
```

3. The fancybox module with id 115 and with no position is set to display Inline Content with this Youtube Embed code:

However, when I re-open this last module for editing, I see that the embed code is no longer in the Inline Content box.

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
