img src html Stripped from \"Link Text\" Attribute

Posted by impalanetworks - 2012/08/27 18:33

_____

Hello,

In the Joomla 1.5 version of Ari Fancybox I could insert html code into the "Link Text" attribute in an Article-type fancybox module in order to make the link and image, rather than text. I'm now in the middle of an upgrade of the site to Joomla 2.5 with the most recent version of Ari Fancybox, and everytime I enter the tag:

into the "Link Text" attribute and click save, the html is stripped out.

Please help.

Thanks,
Ben.

_____

Hello,

Download and upgrade "ARI Fancybox" module. It should help.

Regards,
ARI Soft
