
Link in main menu

Posted by juliuiip - 2010/03/10 13:58

Is it possible add link to main menu?
Thank You

Hello,

Could you explain what link you need? To display on this page image gallery?

Regards,
ARI Soft

Ok I will try.. :) and sorry for my english...

I want to load search module in fancybox from main menu (add search button in menu, and after pushing this button that occur fancybox with search module).

Thanks

Unfortunately you can't do it for standard Joomla! menu point because Joomla! provides limited functionality for creating menu point, but you can do this button in any Joomla! content. For example in template file, a component content or in 'Custom HTML' Joomla! module. You can try to use the following hack for using fancybox in menu item, but it can require additional CSS styles because it depends on which menu module you use:

1. Install 'ARI Fancybox' module.

2. Install 'System - ARI Fancybox Anywhere' plugin, open plugin settings page, set 'Mode' parameter to 'Anywhere', enable plugin and save settings.

3. Create new menu item with type 'External Link', enter # in 'Link' parameter and enter the following code in 'Title' parameter:

```
{arifancybox activeType="module" opt_width="300" opt_height="250" id="" link="Search" title="Seach"}}{/arifancybox}
```

where # is ID of search module, you find it on search module settings page.

I'm sorry for disturbing, but did you received my email?

Re:Link in main menu

Posted by admin - 2010/03/11 15:11

Yes, we received your mail and answered yesterday. Check your mail, please. In brief, download the extension in 'Member Area' on our site, re-install 'ARI Fancybox' module and add wrapTag="div" parameter to {arifancybox} tag in name of menu item.

Regards,
ARI Soft

It works!
Great module, great support!

Thanks

Hello,
I have one new issue, as I said before module works great, but when I tested with different browsers appeared some problems:
In menu line where is no text of the module and module does not work
<http://www.ari-soft.com/images/fbfiles/images/Screenshot.png>
On linux (ubuntu) - works with all except chrome
on win xp - works firefox, opera, don't work IE and chrome
osx 10.6 - firefox ok, but Safari, Chrome not.

Hello,

Download updated version of the extension in 'Member Area' and upgrade 'ARI Fancybox' module and 'ARI Fancybox Anywhere' plugin, please. It should help.

Regards,
ARI Soft

Hello,
I was facing a new problem. When fancybox is enabled, I am getting this strange line (picture 1) when fancybox is disabled when it's all correct (picture 2)
And it's the same everywhere where there is tabs (hwdvideoshare, flexicontent "tab template")
Where could be the problem?
Thanks
