to use the following syntax in an image map or roll-over? {arifancybox activeType="article" opt_width="340" opt_height="500" id="15" link="Link" title="Title"}{/arifancybox} ===================================	Links in imagemap rollovers Posted by rustyremco - 2013/04/18 20:54
Hello, Use the following HTML code for "System - ARI Fancybox" plugin: Regards, ARI Soft Re:Links in imagemap rollovers Posted by rustyremco - 2013/04/19 16:22 First of all I don't want to open an external page and this will open the page in a new window, not a pop-up? Is it possible to use the following syntax in an image map or roll-over? (arifancybox activeType="article" opt_width="340" opt_height="500" id="15" link="Link" title="Tritle"}(/arifancybox) Re:Links in imagemap rollovers Posted by admin - 2013/04/19 16:31 The pages will be loaded into the lightbox with the code which we provided. If you want to load an article, use the following link: index.php?option=com_content&view=article&id=ARTICLE_ID&tmpl=component Where ARTICLE_ID is ID of the article which you want to load. Regards, ARI Soft Re:Links in imagemap rollovers Posted by rustyremco - 2013/04/19 16:45 Thanks! It's working. I used "Fancybox anywhere" that's the reason it didn't work I think!	How to use the fancybox syntax in multiple rollovers in a imagemap?

	Thanks! It's working. I used "Fancybox anywhere" that's the reason it didn't work I think! Thanks again!

Re:Links in imagemap rollovers Posted by rustyremco - 2013/04/24 17:46
I can't find how to open a module instead of an article!
Re:Links in imagemap rollovers Posted by admin - 2013/04/24 19:57
Load a module into an article with help of "Content - Load Module" standard Joomla! plugin or with help of "Modules Anywhere" or "Module Plant" 3rd party extension and then load the article with the module into the lightbox.
Regards, ARI Soft
