Fancybox external content - Browser issues
Posted by dimps1 - 2013/04/19 11:56

_____

Hi,

I am trying to load some external content in a modal window. It loads in IE9, but not Chome (latest) or Firefox (latest).

I have tried setting it in the Ari Fancybox module as well as as a custom HTML module using the following code:
{arifancybox activeType="rcontent" opt_width="760" opt_height="700" url="http://www.xxx.co.za/new/index.php" link="Client Login" title=""}{/arifancybox}

In all browsers, it shows an underlined link, but the link only functions in IE.

What am I doing wrong?
Thanks and regards.

_____

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

http://eyeqbeta.co.za/wisesure/
top right.

1st link is to another site via the module.
2nd link is the real one I need to activate.

Thanks

_____

This problem with site template styles. Add the following CSS rules to a site template CSS file:

DIV.headerbox
{
 z-index: 2;
 position: relative;
}

DIV.art-shapes
{
 z-index: 1;
 position: relative;
}

Damn you're clever! I would never have thought it had anything to do with CSS.
Thanks very much for the quick reply, and - it works!
