ARI fancybox moves modal popup to top

Posted by pnteixeira - 2010/07/31 14:13

_____

Hello!

In one article I'm using ARI fancybox to open an internal page on a modal popup.

The code i'm using is:

 clickme

When I click the hyperlink, the modal popup opens with the link and moves the modal box to the top of the browsers window, scrolling the background contents.

Is there any way to avoid the scrolling on the backgroung article?

You can see this happening in this page: Link
and clicking on the 1st hyperlink "taxa de libertaÐ·Ð³o do bÑƒnus" at the 2nd paragraph.

Hello,

We have updated 'System - ARI Fancybox' plugin. Download 'ARI Fancybox' package in 'Member Area' on our site and re-install 'System - ARI Fancybox' plugin. It should help resolve this issue.

Regards,
ARI Soft

Hi,

Thanks for the reply.

I've re-installed the plugin but the same problem continues (I've even uninstall the previous one and made a new install of this one). This issue only happens when the target page has an anchor in the content.

Any thoughts how to solve this?

Thanks for your time.

Hello,

Could provide temporary access to your Joomla! backend by email that we can investigate this issue more deeply and provide solution?

Regards,
ARI Soft
