
No Transition effects in slideshow

Posted by jmk - 2011/02/05 15:58

Hi,

Is it possible to turn the Transition effects off.

Perhaps I don't see it but I can't find it to turn it off.

I hope you can help me,

Best regards,

Joep

Hello,

Set "Effects duration" parameter to "0" if you don't want to use transition effects.

I already do that, but the Effect still shows.

Strange is that first the photo is shown, then it disappears and then the photo is shown with effect.

Could you provide a link to a page where we can see it?

Download and upgrade "ARI Image SlideShow" module please. New version should display images without transition effect if "Duration" parameter is set to "0".

Hi,

Setting "Effects duration" parameter to "0" does not work and i still have effects being shown.

I take pictures from picassa galleries.
Develpment url is <http://desarrollorejas.e-crespo.com/>

There is a main big slider, and some mini sliders just below it.

Thanks in advance for some help...

Hello,

Download and upgrade the module. After this clean browser's cache. It should help.

Regards,
ARI Soft

Hello again and thanks for the fast response,

If i upgrade to 1.4.1 it works, but then i can not see options settings panel when editing the modules.
I am using joomla 1.7

If i use the 1.4.0 version the "0" effects duration doesn't do the trick.

version 1.4.1 isn't working well for joomla 1.7?

Posted by admin - 2011/12/17 18:15

Hello,

1.4.1 is compatible with J! 1.7. Could you provide temporary access to Joomla! backend by email where we can see a problem?

Regards,
ARI Soft

So sorry,

I have just found a problem with my own css backend and the options settings part. Now i can see the options part in modules.

So this is solved, and 1.4.1 is working and the setting for no transition effects is ok also.

Thanks you very much. :)
