
Problems with thumbnails configurations

Posted by juanjo - 2011/06/27 23:52

Hello there,

I'm having a hard time setting up the slider to show thumbnails. When I set "Use thumbnails" to "yes" it shows my slide images like thumbnails. If I set "use thumbnails" to "No" and Enable navigation preview thumbnails to "Yes" it shows the images just fine but no thumbnails.

Here is the link for the Beta Site: <http://doctoroffice.silviaborge.com/>

I have "Manual advance" set to "No"
Lightbox integration set to "No"

Attached is a screen shot for the backend, if that helps.

Thanks in advance for your help. http://www.ari-soft.com/images/fbfiles/images/ari_config_backend.JPG

Hello,

If "Use thumbnails" parameter is set to "Yes", the module will generate thumbnails automatically and show it in the slider. Original image will be shown if a user clicks by a thumbnail from the slider. Preview thumbnails is shown when a user mouse over navigation button ("Show slides navigation" parameter should be set to "Yes").

Regards,
ARI Soft
