
Slideshow with audio commentary

Posted by tony7671 - 2011/06/29 23:15

Is there any possibility of using this or one of the other components to provide a slideshow with an audio commentary? Ideally would offer the possibility to start a MP3 playing when the slide appears, and move to the next slide when the MP3 finishes (perhaps after a slight delay), and also the ability to select manual slide advance.

Hello,

Sorry, but our extensions don't support described ability.

Regards,
ARI Soft
