
Images not appearing

Posted by akopp - 2011/08/01 22:03

Are the images supposed to be the same width and height as set in the parameters? I can see where the slideshow will go on my page, but the images are not showing up.

I tried to attach a pdf of my page, but it is not valid to upload. I am reattaching it as a doc. http://www.ari-soft.com/images/fbfiles/files/akopp_module_manager.doc

Hello,

Could you provide link to page where we can see the problem and temporary access to your Joomla! backend by email that we can investigate the issue?

Regards,
ARI Soft
