
Some fields not being stored in database

Posted by tubbergen - 2012/04/02 09:24

I'm using J! 2.5.3 and ARI Image Slideshow 1.4.1

Some fields of the module aren't being stored in the database, whatever I fill in. For instance: imglist_subdir

Can you confirm that it's a bug or if it's due to my configuration/other extensions?

Hello,

Check that "System - ARI Extensions" plugin is installed and enabled.

Regards,
ARI Soft
