Feature Request - Random Starts After First Slide
Posted by jdduffield - 2012/04/07 04:59

_____

I just purchased your slideshow extension. I'm building a side where the first slide needs to be the same each time, but random can occur after that. Also, it would be nice to have a cross-dissolve (fade) transition effect implemented as well.

_____

Hello,

Thank you for your suggestion. The first feature is a specific feature so we can implement it as custom development. If you are interested in it, contact us by email please.

Regards,
ARI Soft

I was able to figure out a work-around for this. Thank you. I placed the first picture on the homepage using absolute positioning, then put a javascript timer on it. Works like a charm and is cross-browser compatible.
