
CSV File on Flickr?

Posted by tttschopp - 2012/06/30 20:38

I have the ARI Image SlideShow installed and working. Very nice.

Question: If I have my images on Flickr can I use a CSV file to specify titles and links? If so, where do I place that file?

Thanks.

Hello,

CSV files can be used for images from local folders. It is not possible to use them for Flickr images.

Regards,
ARI Soft

Thanks for the quick response. I don't know how difficult it is to add but I would vote for adding this feature to your list of enhancements. Thanks again.
