## .ini file

Posted by ibextrex - 2013/01/02 12:33

---

I have my title and description working but can I put a line break into the description?? What is the code??

It would be better if the title, description and link was editable in the module in joomla. and some instructions would not go amiss.

Hello,

HTML tag in description to add a line break.

Regards,  
ARI Soft
