
Breezingforms on the same page breaks slideshow

Posted by woodenfish - 2013/02/26 19:39

I have a site under construction where I have some pages with only the slideshow, and others where a Breezingform is also displayed. On only these pages the slideshow never goes further than 'Loading'

Test URL <http://sgh.woodenfish.nl>

Any help to resolve this problem would be appreciated.

Hello,

On what page we can see the problem? Home page doesn't contain breezing form extension.

Regards,
ARI Soft
