Slide show does not smoothly change the image...:(

Posted by makichan - 2013/09/23 01:59

Hi,

I have created Joomla! site call:

www.cairnstaiko.com

I have install extension of Image SlideShow, but when I looked at it, the images on Home does not transit as smooth as I want.

Another word, if you look at the slideshow, I can see the bottom and left side of image is bit strange.

I have created actual image to exact size of slide show, but still does not solve my problem.

I would really appreciate your kind help. :)

Thank you.

Hello,

This problem with site template styles. Add the following CSS rule to fix the problem:

```
.ari-image-slider IMG
{
 margin: 0 !important;
}
```

Regards,
ARI Soft
