Hye,

I can't have Ari slideshow showing in any position set in the beez5 template on Joomla2.5.

If i create an article and use loadposition it works, but i want to load Ari Slideshow on position-4. I've tried the other positions, the same problem occures.

What i'm y doing wrong?

Thanks for any help!

Hello,

Could you send a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

Beez5 template uses hide/show panel for "position-4" and it works only if "Show title" parameter is set to "Yes" in module settings.
