Request possible link

Posted by rso - 2010/07/07 23:11
_____

Would like to link from module to a special page....
Is it possible ?

Like the Slideshow very much, and especially multi directories is very powerfull....
Very nice :)

Hello,

Could you explain in more details what you mean? Do you want to embed slide show to specific page?

Regards,
ARI Soft

_____

Just when the slideshow runs, that i can link to a specific page regarding the slideshow.

www.tagservice.dk

Want to link slideshows from the frontpage to the specific area

_____

If we correctly understand, do you want to redirect a user to specific page if he or she click by an image in slideshow?

Regards,
ARI Soft

_____

We have updated the extension, download it and upgrade 'ARI Image SlideShow' module, please. It contains new parameter 'Link' which is used as redirect link. If you want to indicate specific redirect link for each image, you can use CSV file for this purpose.

Regards,

ARI Soft

Havent found out how to make the CSV file yet, but that will come later.

Super fantastic extra feature....
Thanks a lot
GREAT STUFF

 :silly:

Hello,
this feature " to redirect a user to specific page if he or she click by an image in slideshow" not works.
Please see screenshot and csv

How to use this feature?

Thanks http://www.ari-soft.com/images/fbfiles/images/link.jpg http://www.ari-soft.com/images/fbfiles/files/csv.txt

_____

CSV file should be located in folder with images. In you case it is /images/stories/slide/ folder.

Regards,
ARI Soft

_____

We have checked it on our test sever and the module works fine, but we checked it on the latest version of the module (1.3.3). Upgrade your module to the latest version please and try again. If it doesn't help, could you provide temporary access to your J! backend by email that we can investigate the problem?

Regards,
ARI Soft

_____

I have update ARI Image SlideShow to version 1.3.3 but it doesn't help.

Access to J! backend I send to You.

Thank You.
