
Display text next to image?

Posted by TimScudder - 2010/08/03 21:07

I have a new requirement - to display a brief summary next to eac image. Can this be done?

Hello,

How do you want to display this information?

Regards,
ARI Soft

I would like to be able to have a formatted box to the left of the image - same height as the image, but able to set the width, font, font size, etc. It would be ideal to be able to embed hyperlinks in the text - the idea is to be able to link to the article associated with each image.

Different topic - I checked the notify me checkbox and assumed that I would receive an e-mail when a reply is posted to the forum thread. I have not received anything. My e-mail address in my profile is correct.

We'll add this feature in a future release. Regarding notification, check your Junk or Trash mail folder, please.

Regards,
ARI Soft

OK.

I don't have spam filter enabled, so there is nothing in Junk e-mail or Trash.
