
loadposition sometimes does not work

Posted by Antonino Migliore - 2011/02/26 13:27

Hi

the following instruction does not works for a specific case: image gallery
{loadposition ari-image-gallery}

Here it works fine with 1 image

<http://www.finavalholding.com/site/index.php/it/menugruppo/struttura-del-gruppo>

Here it does not works! I tried a lof of stuf but nothing.

<http://www.finavalholding.com/site/index.php/it/multimedia/galleria-di-immagini-slides>

Gallery works fine if I use the template position-12

thanks

note : I will send you the access for the back-end

Hello,

Check that "Content - Load Module" plugin is enabled and if you use WYSIWYG editor switch it to plain text code and check that plugin code is correct because WYSIWYG editors can add extra HTML entities in design mode. If it doesn't help, provide temporary access to your Joomla! backend by email and we will investigate this issue in more details.

Regards,
ARI Soft

GREAT! it works fine now...

You are right...previous works because loadpasition was inserted using the standard editor of joomla, last one dint work because I just ainstalled a WYSIWYG editor.

BTW great plug-in and great support from ARI-Soft

ciao
