
No next and previous button..

Posted by daverosen - 2011/03/07 05:46

In the demo, there is a next and previous button to get to other images on the page.
Is there a way to enable it?

Hello,

Yes, define "rel" parameter of tag in the following way:

rel="sexylightbox"

Where GROUP is group name, the lightbox provides ability to navigate between items with help "Prev" and "Next" button for items from the same group.

Regards,
ARI Soft
