
Simple detail title in the top

Posted by brasmaster - 2011/03/16 05:21

I would put the title that is at the bottom on top.

Hello,

The plugin doesn't support this ability. It requires modification of javascript code.

Regards,
ARI Soft

I understand, but it is a logical detail, simple but very important.
Please help me because the title in the footer is not legal, and the title should always be on top of any subject. thank you.

The lightbox is design in this way. If you want to show title at the top of lightbox, you can be interested in ARI Colorbox extension (Theme 1, Theme 3) or ARI Pretty Photo extension.

Regards,
ARI Soft
