
Joomla 1.6 help

Posted by Jimmy - 2011/03/16 07:44

I have been using Joomla 1.5 and this module works great. I have a new site using 1.6 and cannot get this to work. Can some one please list the steps to properly display a photo gallery in an article.

I am getting a red X for the thumb and a 404 error when I click on it. It seems like a path issue.

This is my code:

Am I doing something wrong?

Hello,

The code looks incorrect. Try the following code:

If it doesn't help, provide link to page please where we can see the issue.

Regards,
ARI Soft
