## Lightbox under code problem..

Posted by daverosen - 2011/03/30 04:02

---

The lightbox is working great, but one thing I've noticed with many pictures and code on the site I am working on, is that it is always going under any items such as a youtube video, and some pictures set with PHP/Javascript code.

How to fix? [http://www.ari-soft.com/images/fbfiles/images/lightbox\\_prority\\_problem.jpg](http://www.ari-soft.com/images/fbfiles/images/lightbox_prority_problem.jpg)

Hello,

Check that `()` tag for videos have "wmode"="transparent" parameter (attribute).
