
Joomla 1.6 Extension manager - discover ?!?

Posted by ZegativeNero - 2011/04/13 03:47

Hello,

i`ve installed ari sexy lightbox lite under joomla 1.6 and everything works!

Only Problem:

When I open the extension manager and hit discover, the plugin is listed ?!?

If I select it, and hit install, there are some error messages, and there are two plugins under the "manage tab". Its impossible to uninstall one of them.

How can I fix this ?

Best regards

=====

Hello,

We don't see the plugin on "Discover" tab on our test server. We can investigate described problem if you provide temporary access to your Joomla! backend by email.

Regards,
ARI Soft
