Ari Sexy Light Box Lite

Posted by inez71 - 2011/08/17 16:10

_____

I have installed this plugin to show a lightbox for a single photo. The html code
  seems to work but I don't understand where the thumbnails are stored. Do I need to create thumbnails myself (how???)
or do I also need to do this via ARI?

_____

Hello,

"ARI Sexy Lightbox Lite" can't create thumbnails automatically. This feature is available in "ARI Sexy Lightbox".

Regards,
ARI Soft
