
Article link in a pop-up

Posted by xega - 2011/08/25 18:10

Hi there

I'm trying to create a pop-up with an article inside, but I only want the article itself, not the "next" button and other stuff. I've tried some of the samples I found here in the forum, but none of them have worked correctly. The last code I tried was this:

Show article

You can see a sample by going to this page:

<http://www.hafdal.dk/index.php/kirkegarde/lysabild-kirkegard>

Enter test into the search field and you will see the effect I get.

Hello,

You can disable articles navigation on article edit page. See "Parameters (Advanced)" section.

Hi great thanks! I'm trying to add margins in the lightbox in my CSS file, could you tell me how I can accomplish that?

hi again. Strange, I had tried that solution before and it didn't work, but I guess second time was the charm :-)

THanks again - you are awesome!
