
Lightbox under some youtube movie

Posted by Shtok - 2011/09/03 18:29

Hi,
I gave Lightbox a try and loved it...until i changed the browser too see how the site looks like (in Firefox, IE and Chrome)..usually i work with Opera.

In Firefox, IE and Chrome the lightbox shows the picture under a youtube movie..why is that and how can i fix it.

I've made 2 screenshots to make my point:

<http://imageshack.us/f/607/14883613.jpg/>

<http://imageshack.us/f/849/51597076.jpg/>

Please see them both and you'll know what i mean...

You can also see it directly on my website:

<http://720.ro/index.php/after-effects/tutorial-after-effects-inceparatori/70-cc-wide-time2.html>

Please give me some directions, because i really don't want to take it from the beginning with another plugin.

Thank you.

EDITED

I removed the youtube movie and embeded a vimeo one...strange thing but the lightbox goes over it not under it...so the issue is with the youtube code...

Anyone knows what is going on?

Thanks.

=====

Hello,

Described problem can occur if video object doesn't contain wmode="transparent" parameter.

Regards,

ARI Soft
