## Article in Lightbox

Posted by PinkConnect - 2011/10/05 10:38

---

I am having trouble getting an article to show in a lightbox.

I can get the lightbox to execute but the article doesn't load.

I have read the documentation which says to Use 'Article ID' parameter that specify id of necessary article. but not sure where the code is going wrong.

I can't advise of link to site as this is locked off until ready for production.

Please advise.

Hello,

If you use "System - ARI Sexy Lightbox Anywhere" plugin, use the next code:

```
{arisexylightbox activeType="article" width="500" height="500" id="269"}}{/arisexylightbox}
```

If you use "System - ARI Sexy Lightbox" plugin, use the following code:

The catch is...this shows the header and footer as fully rendered by Joomla not just the article.  
Is there a way around this?

It can be a problem with your site template, if it doesn't support print view. We can investigate the issue in more details if you provide a link to a page where you use the extension and temporary access to your J! backend by email.

This has been fanatical support. Admin offered to sign into the backend of our install, fixed everything and supplied the updated code for us to use.

Huge thanks.
