How to put a twitter button next to description?

Posted by fildin - 2012/02/11 23:21

_____

Hi folks,

firstly - thanks for this great plugin!

I was trying to put twitter share button in the lightbox just next to the image description. I have gone through all of source files, but haven't find the right place for it anywhere. I just need to get the button on the bottom of the lightbox. Sounds easy... grab the code and put it into lightbox template ... but in fact it seems to be more tricky. The Show function in js file needs to be adjusted, but I don't know how. If anybody (admin or other expert) wants do it for me and be paid for it, don't hesitate to send me a PM. Thank you :)
