
How to use 1 lightbox for many articles?

Posted by Internaut - 2012/04/13 04:09

I have a series of articles that slide using the Lof Article Scroller Module. It shows limited amount of text/image and ends with a option to read the remainder of the article.

Is it possible to use Ari Lightbox to open each "More" when clicked without coding every article?

Reason is, there will be several people with access, writing a new article each week. Some find using a WYSIWYG very difficult, let alone having to add code to every article to make it show in the Lbox.

Hello,

Could you provide a link to a page where we can see the slider and "More" link? We suppose it is possible to attach the lightbox to all "More" link with help "ARI Sexy Links" plugin from ARI Sexy Lightbox, but we need to see the slider to give an exact answer.

Regards,
ARI Soft
