
Inline content with tables

Posted by ACSS001 - 2012/09/02 13:07

Hi, and thank you for your beautiful plug-in.

I have just downloaded the ARI Sexy Lightbox Lite and I gave tried all the given combinations (inline text, photo, ext link) and works wonderful.

I have a question though.

Is there any way to put in the inline content a table and/or photo?

Thank you again.

Alex

Hello,

You can use HTML code to put image or table.

Regards,
ARI Soft

So, I can do it with Lite. Don't need to go to full.

Thank you very much for your help.
