navigation arrows

Posted by abqsue - 2012/09/03 22:59

_____

In the demo for ARI Sexy Lightbox Lite, navigation arrows (next and previous) appear with the images of the Audis in the lightbox. When I use the lightbox on my site, no navigation arrows appear (and it appeared that none came with the plugin). Am I missing something?

_____

Hello,

Use rel="sexylightbox" attribute for tags instead of rel="sexylightbox"

_____

For example if you want to use "album" group name, use the following rel attribute:

rel="sexylightbox"

_____

so do i understand you correctly: in the attribute i can define the group name and can choose whatever comes to my mind? or do i define the group name somewhere else?

_____

Specify group name only in "rel" attribute.

_____

hm, doesn't work (yet).

is the following syntax correct?

_____

What doesn't work? According to your code you have only one item in "imagegroup" group.

_____

right - i just posted one of my items, which all have the same code (except the image file path, of course).

despite inserting rel="sexylightbox" in the tag, the images are desplayed without "next"- and "previous"-arrows.
so i can only watch one picture at a time, then close the lightbox and click on the next thumb to open the lightbox again.

_____

Navigation buttons are not shown because all thumbnails are linked to the same image (ABSTELLRAUM -

2013.03.18.jpg).
