
Scripts load but the lightbox does not

Posted by mehdisz - 2013/05/04 00:13

I have installed mod_arisexylightbox in Joomla 3 site. I have tried different parameters with the module, but can not get it to either show a text to click, or to load if set to automatically run on page load. The scripts seem to load in the header page, but there is nothing in the module position specified.

Hello,

Could you provide a link to a page where we can see the problem and send screenshot(s) of module settings page by email?

Regards,
ARI Soft
