## only works with index2.

Posted by Tjekov - 2010/05/03 15:06

---

The only way I can get the lightbox to work is if i use the index2 instead.

Ex.

Work

[http://kiviksaif.com/index2.php?option=com\\_content&view=article&id=104&Itemid=6](http://kiviksaif.com/index2.php?option=com_content&view=article&id=104&Itemid=6)

Doesn't work

[http://kiviksaif.com/index.php?option=com\\_content&view=article&id=104&Itemid=6](http://kiviksaif.com/index.php?option=com_content&view=article&id=104&Itemid=6)

And I can't figure out where the link to article should be in the second link on the examples.

EDIT: Just discovered that it was just in Google Chrome it didnt work with the index link. But my question is still where the link should be.

Hello,

If you want to show an article in lightbox, use the following code:

Marcus Svensson

instead of

Marcus Svensson

Regarding issue with Google Chrome, if you provide access to your Joomla! backend by email, we can investigate this issue. It seems like a problem with 3rd party extension.

Regards,  
ARI Soft
