
Close/Next/Prev buttons not show up?

Posted by sophie - 2010/05/07 13:56

Hi there,

I just downloaded the Ari SexyBox Free version from your site and installed the plugin in Joomla 1.5. Enabled the plugin, made a test by making a new article, switched to html, added the demo example

Any HTML content

Show inline content in modal window

to see the lightbox with inline code.

When I save the html+article, I see the link to open the lightbox (show inline content in modal), the lightbox opens, and I see the text Any HTML content. So that's all fine.

However, I do not see the close button.

I'm working with Joomla on localhost and can find the related image within the
mysite\plugins\content\arisexylightboxlite\js\sexyimages\black\buttons.png image. I've looked in the related files, but I can't figure it out,

how can I show the close button???

=====

Hello,

We can help you, if you can provide link to page where we can see this issue because we can't reproduce it on our test server.

Regards,
ARI Soft
