## Display a \"leaving message\" on external link

Posted by bento124 - 2013/11/11 21:02

---

Hello to all,

I am looking for a method (plug-in, or component) which allows to re-direct to an external URL, displaying during a short moment (~ 5 sec.) an "leaving message / pop-up", an information windows, like "You are now leaving the website of ...".

So far I was screening this product an wondered, if it would give me this option.

Thanks for your feed-back!

Hello,

The extension doesn't support the described ability.

Regards,  
ARI Soft
