
where he hit

Posted by tatip - 2010/06/22 21:11

Forgive the ignorance, which hit this code to run the plugin

"Http://translate.google.com.co/translate?u=http% 3A% 2F% 2Fwww.ari-soft.com% 2FARI-Sexy-Lightbox-Lite% 2F & sl = en & tl = en & hl = & ie = UTF-8 "
thanks

Hello,

Could you explain your problem? You can't run the plugin or what you mean?

Regards,
ARI Soft

Hi, thanks for responding.

download the plugin, activate it, but do not know where to paste the line of code to display external windows like the example shown in google.

'ARI Sexy Lightbox Lite' is Joomla! content plugin, it means this plugin works in Joomla! articles. Open an article and type sample code in it. If you use a WYWIWYG editor, switch it to plain text mode that avoid problems with extra tags which editor can add.

Hello, good morning.

The code "http://www.google.com/?TB_iframe=1&width=700&height=325&modal=1" I open an article and posted it there, that's what you say, that I have a form I want to be shown on this way and no how. Thanks

Hello,

Could you provide temporary access to your Joomla! backend by email and say link to page where you can try to use the plugin that we can investigate this issue?

Regards,
ARI Soft
