## lightbox doesn't pop up just open in another page

Posted by geniedon - 2010/07/01 08:51

---

Hi,

When I first installed ARI Sexy Lightbox Lite, my external pages were popping up in a lightbox, now they are just opening up in an external page.

I used, as a test:

Goooooogle

and my own aswell:

both don't work now, it seems very strange it worked when i first installed plugin.

Thanks  
geniedon

Hello,

Provide link to page, please, where we can see this issue. It can be conflict with 3rd party extensions.

Regards,  
ARI Soft

Hi,

Thanks for the quick reply, I got it to work by going to plugin settings and turning load assets from "auto detect to always"

Everything seems ok now.

I'll get back to you if the problem arising again.

Cheers  
geniedon

Hello,

Your page doesn't contain link for sexylightbox. Maybe you have disabled it.
