
Code for gallery?

Posted by xylhim - 2010/07/17 20:06

Hello,

I'm using ARI sexylightbox lite and wanted to know what code I should use to incorporate a gallery from a single thumbnail image?

=====

Re:Code for gallery?

Hello,

You can use the following HTML code:

```

<img alt="Thumbnail image" data-bbox="42 321 71 392" />

```

Where `is` path to large image and `is` path to thumbnail.

PS: You can use ARI Sexy Lightbox extension, it provides easy way to create image galleries based on images from specific folder(s).

Regards,
ARI Soft
