
How should I do

Posted by crapulfeust - 2011/08/09 07:35

Hello!

(sorry for my English...)

I can't get ARI Photo Gallery to work! (and Ari sexy lightbox to...)

I made configurations (plugins...) and I made a module picasa and put this link in the article...

{arisexylightbox activeType="picasa" user="" album=""}

 and another one

{ariphotogallery moduleId="95"}[/ariphotogallery]

and I just have text in my article but no gallery, no lightbox

What did I make wrong?

C.

Hello,

Check that "ARI Sexy Lightbox" module is installed and "System - ARI Sexy Lightbox Anywhere" plugin is installed and enabled. Correct code for lightbox should look like:

```
{arisexylightbox activeType="picasa" user="crapulfeust" album="test"}{/arisexylightbox}
```

If you use a WYSIWYG editor, switch it to plain text mode and check that plugin code is correct. WYSIWYG editors can add extra HTML code in design mode.

About "ARI Photo Gallery", code should look like:

```
{ariphotogallery moduleId="95"}{/ariphotogallery}
```

"ARI Photo Gallery" module with ID equals to 95 should be enabled.

Regards,
ARI Soft

Thanks for Your answer but...sorry it don't work

I have made different copy of my screen (admin)....

<https://picasaweb.google.com/113143330697597692434/Ari?authuser=0&authkey=Gv1sRgCID-hYfisvTmDQ&feat>

I just can see the text in n my article but not my galerie

```
{arisexylightbox activeType="picasa" user="crapulfeust" album="test"}{/arisexylightbox})
```

Sorry...
and ...thanks :unsure:

Could you provide link to page where we can see the problem and temporary access to your Joomla! backend by email that we can investigate the issue?

Regards,
ARI Soft

Try now please.

Regards,
ARI Soft

Re:How should I do

Posted by crapulfeust - 2011/08/09 15:07

Very Nice !!!

What was wrong ?

THANKS !

Re:How should I do

Posted by admin - 2011/08/09 15:08

Incorrect code was used. You use "ARI Pretty Photo" extension, not "ARI Photo Gallery".

Regards,
ARI Soft

ohhhhhhhhhh sorry
and for {arisexylightbox activeType="picasa" user="crapulfeust" album="test"}{/arisexylightbox} ?

very sorry, can you explain me ?

Thanks

I take more time to look what you do, and I think I have understand, so i will take more test but I have some module on my site, thanks a lot.

I just have a last question, with you exemple here : <http://www.demo2.ari-soft.com/ari-pretty-photo.html>

With the galery of cars.

How can I do for having the same with flickr pictures ? and how can I do to have the "presentation" of all picture in a line, as you have, when i click on a car picture and I see the pop up with the car and ...under, a line with the gallery. can I do that with the flickr gallery and the ari pretty photo , like you (sorry for the explication")

Thanks a lot for your patience.

C.

...After that, you can (or me) close the post.

About thumbnails navigation, set "Gallery thumbnails" parameter to "Yes" in "System - ARI Pretty Photo Anywhere" plugin settings. About Flickr, create Flickr photoset, enter Flickr API Key in plugin settings and use the next code:

```
{ariprettyphoto activeType="flickr" source="photoset" photosetId="PHOTOSET_ID"}{/ariprettyphoto}
```

Where PHOTOSET_ID is Flickr photoset ID.

Regards,
ARI Soft

Re:How should I do

Posted by crapulfeust - 2011/08/12 10:20

Sorry....
for the "thumbnails" that what I have done but....nothing

picasaweb.google.com/lh/photo/dsX8LutfyeLUqQWIW268VQ?feat=directlink

and for flickr...I have copy/paste the code but....nothing to (only text), you can see that here

negele.fr/index.php?option=com_content&view=article&id=105:ari-yosemiteparc&catid=119&Itemid=

You have the acces on my backend if you wanted tu use it...

Re:How should I do

Posted by admin - 2011/08/12 10:56

Try now please. Flickr API key was not entered in "System - ARI Pretty Photo Anywhere" plugin settings and was typo in {ariprettyphoto} tag.

Regards,
ARI Soft

Re:How should I do

Posted by crapulfeust - 2011/08/12 11:40

ok,
and what about gallery thumbnail overlay ?

C.

Re:How should I do

Posted by admin - 2011/08/12 11:59

Try now.

Regards,
ARI Soft

Re:How should I do

Posted by crapulfeust - 2011/08/16 11:50

Yes but what was wrong for the thumbnail overlay?

and You say, it was "typo" in tag ...ok but

I always copy/paste the code, and it's always wrong ? why ?

A exemple here http://negele.fr/index.php?option=com_content&view=article&id=111:artphotoyosemite&catid=119:les-parcs-photos&Itemid=567 and I paste in the article {ariphotogallery moduleId="108"}{/ariphotogallery}

Re:How should I do

Posted by admin - 2011/08/16 11:53

Code looked like:

```
{/airprettyphoto}
```

instead of:

```
{/ariprettyphoto}
```

About thumbnails overlay, we have set "Gallery thumbnails" parameter to "Yes".

Regards,
ARI Soft
