
csv file not working in gallery

Posted by lilledos - 2012/04/20 14:35

I have put a module gallery on my site in an article. And the pictures works just fine. But my csv file is not showing its content. I have edited the file in Windows notepad UTF-8 and uploaded it into the same directory as my pictures. Same filename as shown in my gallery module. But no text shows up.
Can you please help me solving this problem. Have been trying for hours without luck. :unsure:

Hello,

Could you provide a link to a page where we can see a gallery and a link to CSV file? You can send it by email.

Regards,
ARI Soft

Hi,

May I know the solution of this problem? I go through the same right now. Took a working csv file, changed the names of the pictures and the description but it won't work. Here is the link
Thank you!

Hello,

CSV file should have "File" and "Title" columns instead of "File" and "Description".
