Struggling to remove \"moduleId\"

Posted by wedontbyte - 2012/05/20 20:33

_____

Hello again. Trying to use parameters (as opposed to moduleId) so that I can use ariphotogallery in multiple web pages. In testing

The following works:

{ariphotogallery moduleId="125" dir="images/front-page" thumbWidth="401" descrFile="fp-titles.csv" }Some Competition Winning Images{/ariphotogallery}

The following also works (albeit the images are too big!):

{ariphotogallery activeType="imglist" type="gallery" dir="images/front-page" thumbWidth="401" descrFile="fp-titles.csv" }Some Competition Winning Images{/ariphotogallery}

The following doesn't work (just displays "Some Competition Winning Images"):

{ariphotogallery activeType="imglist" type="singleimage" dir="images/front-page" thumbWidth="401" descrFile="fp-titles.csv" }Some Competition Winning Images{/ariphotogallery}

Having read other forum entries, I've removed all formatting from the code before saving the article.

I would be grateful if you could point me in the right direction.

Many thanks.

==

_____

Hello,

The code works fine on our test server. Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate it?

Regards,
ARI Soft
