
Size of Thumbnails and Scroll Bar for Tiled Images

Posted by kraymer - 2012/12/09 09:34

Hi,

Is it possible to resize the images that appear in the 'tiled' view on popup, as well as enable a scroll bar? I have a number of images that are being tiled (over 100+) and this of course doesn't fit in a 640x480 popup, if I resize I can fit more, but even then I would like to tweak and also enable a 'scroll' function?

Any tips on where one might look for this functionality, can provide a link, just not sure if it's against your forum rules...

Thanks
Dave

Hello,

Could you provide images where we can see what do you want to achieve? You can send them by email.

Regards,
ARI Soft

Add the following CSS rule to a site template CSS file to add scrollbars:

```
BODY #mb_gallery_ .galleryThumbs
{
  overflow-y: auto;
  height: 100%;
  padding: 0px;
}
```

The following CSS rule can be used to change thumbnails size:

```
BODY #mb_gallery_ .galleryThumbs .thumb
{
  height: 100px;
  width: 100px;
}
```
