## Update Received. Installation Question ...

Posted by price1 - 2008/08/04 15:24

---

Hi there,

I just received the updated version of ARI QUIZ fixing the editor problems and a few other bugs.

My question relates to upgrading to this version.

If I uninstall the previous version, will all of my related SQL tables be destroyed, or will all data be retained?

If you uninstall the previous version all the quiz-related SQL tables will remain untouched.

Regards,  
ARI Soft

Installation successful and now JCE works.

Thanks.
